## PROFESSIONAL SUMMARY

Computer Science student (A.S., Collin College) with prior B.S. coursework at Youngstown State University, building full-stack applications with React, TypeScript, Node.js, and PostgreSQL. Completed Advanced Object-Oriented Programming and developed C++ projects using data structures and file I/O, plus REST API and LLM integrations. Seeking a Summer 2027 Software Engineering Internship.

## EDUCATION

**Collin College**, Plano, TX — In Progress
Associate of Science in Computer Science

**Youngstown State University**, Youngstown, OH
Computer Science coursework toward a Bachelor of Science

- Relevant coursework: Advanced Object-Oriented Programming, Introduction to Computer Science, Calculus I and II

## TECHNICAL SKILLS

**Programming Languages:** C++, Python, JavaScript, TypeScript, SQL, HTML5, CSS3
**Frameworks & Technologies:** React, Node.js, PostgreSQL, REST APIs, Groq API (LLM integration)
**Computer Science:** Object-Oriented Programming, Data Structures, Algorithms, Full-Stack Development, Client-Server Architecture, File I/O, Memory Management
**Tools:** Git, GitHub, Linux/Bash, VS Code, Vim

## TECHNICAL PROJECTS

**CodeMaster** | React, TypeScript, Node.js, PostgreSQL, Groq API — 2026

- Developed a full-stack AI developer platform combining job listings, curated learning resources, GitHub project discovery, an AI tools directory, tech news, and focus music; approximately 90% complete.
- Integrated an external REST API to retrieve live job listings and built a resume-based application workflow with auto-apply support.
- Implemented an AI assistant using the Groq API to help users through the job application process.
- Applied client-server architecture and API request/response handling while building features with AI-assisted development tools.

**Snake Game** | C++, Linked Lists, Object-Oriented Programming

- Built a console-based game using a linked list to manage the snake's growing tail.
- Implemented collision detection, keyboard input handling, and the continuous game loop.

**Task Tracker** | C++, File I/O

- Developed a command-line task manager supporting task creation, editing, and deletion through parsed user commands.
- Used file streams to save task data to local text files and retain it between sessions.

**Linked List Text Editor** | C++, Doubly Linked Lists — In Progress

- Building a Vim-inspired command-line text editor that uses a doubly linked list for cursor movement and text insertion.

## LANGUAGES

English (fluent), Nepali (native)
